

CONTENTS

Preface	i
Presidents of the Materials Research Society of Japan	ii
Inauguration of the Materials Research Society of Japan (MRS-Japan) – Influence of Two American Scholars – Professors R. P. H. (Bob) Chang and Rustum Roy	1
Shigeyuki Somiya	
 Review Papers (These papers were first published in Transactions of the Materials Research Society of Japan, Vol. 35, No. 3 and No. 4. They appear in this issue without modification.)	
Nano-structure design of doped ceria solid electrolytes for intermediate temperature operation of solid oxide fuel cell	5
Toshiyuki Mori, Ding Rong Ou, Fei Ye, Jin Zou, John Drennan, and Alstair N. Cormack	
Organometallic Chemistry on IV Semiconductors and Potential Applications	17
Naoto Shirahata	
A Possibility of Heavy-Metal Recycling by Utilizing Hydrogels	23
Kazuhiro Hara, Satoru Yoshioka and Tetsuaki Nishida	
Effect of Interface Structure on Microstructural Evolution in Polycrystals	29
John G. Fisher and Suk-Joong L. Kang	
C60 Photo-Polymerization using Free Electron Laser	35
Hiroshi Yamamoto and Nobuyuki Iwata	
Impact of Solid State Lighting on Energy Utilization and Environmental Conditions	41
Robert F. Davis	
Ceramic Powders for Advanced Ceramics: What are Ideal Ceramic Powders for Advanced Ceramics?	47
Shigeyuki Somiya, Sridhar Komarneni and Rustum Roy	
Lattice parameter, defect concentration and oxygen diffusion in ceria solid solutions	59
Yasuro Ikuma, Srinivasan Anandan, and Koichi Niwa	
Peculiar Electrical and Magnetic Properties of La(Ba)MnO₃ Thin Films	65
Tamio Endo, Kenichi Uehara, Tatsuya Yoshii, Miyoshi Yokura, Hong Zhu, Josep Nogues, Jose Colino, Kazuhiro Endo	
Flux-pinning mechanisms in high current density superconducting YBa₂Cu₃O_y films	77
Hiroyuki Yamasaki, Kotaro Ohki, Hiroshi Yamada, Katherine Develos-Bagarinao, Yoshihiko Nakagawa, Yasunori Mawatari	
Growth Control of High-Tc Superconducting Thin Films for Future Electronics	85
Kazuhiro Endo, Petre Badica, Hidehito Nanto, Hiroshi Kezuka, Shunichi Arisawa, Tamio Endo
